ANALYTIC SUBJECT INDEX TO VOLUME 1

Airfoils
Flow at the surface, Merit Scott—48, 94
Alloys
Aluminum, thermal expansion, E. E. McCollough—334
Aviation
Light signals for, I. Langmuir, W. F. Westerdorp—273

Biophysics
Biological applications of physics of disperse systems, N. Rashevsky—143
Measurement of blood flow, J. F. Herrick, Edward J. Baldes—407
Blood Flow
Thermo-stromuhr method of measuring, J. F. Herrick, Edward J. Baldes—407

Capillarity (see also Surface tension)
Conduction of liquids through porous mediums, theory and data on soils, L. A. Richards—318
In sands, W. O. Smith, Paul D. Foote, P. F. Busang—18
Structure of wood, Alfred J. Stamm—116
Surface tension of gas-saturated petroleum, C. A. Swartz—245
Cathode rays
High voltage cathode ray and x-ray tubes, W. D. Coolidge, L. E. Dempster, H. E. Tanis, Jr.—230
Cements
Glycol-phthalic anhydride resin as a high-vacuum cement, T. P. Sager and R. G. Kennedy, Jr.—352
Ceramics
Applications of physics, A. V. Bleininger—268
Colloids
Adaptability of ultramicroscopes to the study of colloid systems, L. V. Foster—154
Application of the ultracentrifuge, J. B. Nichols—254
Bentonite suspensions, H. A. Ambrose, A. G. Loomis—129
Electric conductivity and capacity of disperse systems, Hugo Fricke—106
Physics in the study of pigment dispersions, F. A. Steele—101
Contact potentials
Of barium films adsorbed on tungsten, Herbert Nelson—84
Corrosion of pipe lines
Long line currents, Stanley Gill, W. F. Rogers—194

Dielectric constant
Measurement at radio frequencies of N_2, H. L. Andrews—366
Disperse systems
Application of physics to, F. A. Steele—101
Biological applications of physics of, N. Rashevsky—143
Electric conductivity and capacity of, Hugo Fricke—106
Drilling fluids
Bentonite suspensions, H. A. Ambrose, A. G. Loomis—129
Dust
Deposition on walls, W. J. Hooper—61

Editor's Column
Classical approximations in quantum mechanics, J. H. Van Vleck—72
Equations of state of gases, J. H. Van Vleck—71
Hyperfine structure and the constitution of nuclei, E. L. Hill—139
Indetermination principle in quantum mechanics, E. L. Hill—418
Light quanta and electrodynamics, E. L. Hill—208
Photographic models of the charge distribution in atoms, J. H. Van Vleck—73
Production of high velocity charged particles, E. L. Hill—341
Production of high velocity charged particles: An addition, E. L. Hill—418
Quantum theory of the metallic state, E. L. Hill—271
Reflection of electrons in quantum mechanics, E. L. Hill—206
Spinor calculus, E. L. Hill—340
System of "atomic" nuclei, E. L. Hill—205
Theories of the electron, E. L. Hill—141
Transmission coefficients in thermionics, J. H. Van Vleck—74
Valence forces in chemistry, J. H. Van Vleck—69
Vectorial photoelectric effect, E. L. Hill—207
X-ray wave-lengths, crystal structures and fundamental constants, J. W. Buchta—137
Electrical conductivity
Of disperse systems, Hugo Fricke—106
Of hydrocarbons and transformer oil, Lars A. Welo—160

Electrical lines
Charts for *E*, *I*, and *Z* of long lines, H. E. Hartig—380
Electrical Discharge
Time lag of the electric spark, John A. Tiedeman—354
Errata
Electromagnetically controlled three-electrode vacuum tube, F. B. Haynes—422
Gases
Flow of heat at surface of airfoil, Merit Scott—48; effect of grid, Merit Scott—94
Flow through porous materials, gas wells, flow from, M. Muskat, H. G. Botset—27
Heat
Flow at surface of airfoil, Merit Scott—48, 94
Temperature distribution in solid bodies, J. B. Austin—75
Human value of physics
Arthur H. Compton—13
Instruments and methods
Adaptability of ultramicroscopes to the study of colloid systems, L. V. Foster—154
Application of the ultra entrifuge to colloid-physical problems, J. B. Nichols—254
Charts for transmission line problems, H. E. Hartig—380
Dielectric constant measurement at radio frequencies, H. L. Andrews—366
Electromagnetically controlled three-electrode vacuum tube, F. B. Haynes—192; erratum—422
Gas-filled Cs-O-Ag photo-cells, K. H. Kingdon and H. E. Thomson—343
Glycol-phthalic anhydride resin as a high-vacuum cement, T. P. Sager and R. G. Kennedy, Jr.—352
High voltage cathode ray and x-ray tubes, W. D. Coolidge, L. E. Dempster, H. E. Tanis, Jr.—230
Ionization gauge, studies, Neil B. Reynolds—182
Long line currents in buried pipes; measurements of, Stanley Gill, W. F. Rogers—194
Magnetic sharpener, L. W. McKeehan—388
Methods of studying capillary structure as applied to wood, Alfred J. Stamm—116
Radiometric measurements; observation limit of, C. Hawley Cartwright—211
Removing foreign material from hydrocarbons, Lars A. Welo—160
Selective differential photoelectric receiver, I. Langmuir, W. F. Westendorp—273
Thermo-stromuhr method of measuring blood flow, J. F. Herrick, Edward J. Baldes—407
Time lag of the electric spark, John A. Tiedeman—354
Voltage selective nonlinear bridge; selective relay, Chauncey Guy Suits—171
Kinetic theory (see **Gases**)
Lath marks
Deposition of dust on walls, W. J. Hooper—61
Light signals
In aviation and navigation, I. Langmuir, W. F. Westendorp—273
Liquids
Capillary conduction of water in soils, L. A. Richards—318
Capillary rise in sands, W. O. Smith, Paul D. Foote, P. F. Busang—18
Metallurgy
Applications of physics to, H. W. Gillett, H. W. Russell—1
Photoelectricity
Gas-filled Cs-O-Ag photo cells, K. H. Kingdon and H. E. Thomson—343
Pigment dispersions
Physics in the study of, F. A. Steele—101
Radiometers
Observation limit of radiometric measurements, C. Hawley Cartwright—211
Soils
Capillary conduction of water, L. A. Richards—318
Spark, electric
Time lag, John A. Tiedeman—354
Surface tension (see also **Capillarity**)
Capillary rise in sands, W. O. Smith, Paul D. Foote, P. F. Busang—18
Variation with pressure of saturation of gas-saturated petroleum, C. A. Swartz—245
Temperature
Distribution in solid bodies, J. B. Austin—75
Thermal expansion
Aluminum alloys, E. E. McCollough—334
Thermionics
Properties of barium films adsorbed on tungsten, Herbert Nelson—84
Thixotropy
Of litharge and glycerine, E. Karrer, P. Wasserman—393
Transmission lines
Charts for *E*, *I*, and *Z* of long lines, H. E. Hartig—380
Ultramicroscope
Adaptability to colloid systems, L. V. Foster—154
Visibility
Diffuse light and point sources, I. Langmuir, W. F. Westendorp—273
Wood
Methods of studying capillary structure; data on sapwood and heartwood, Alfred J. Stamm—116
X-rays
Tubes and their operation, W. D. Coolidge, L. E. Dempster, H. E. Tanis, Jr.—230
